Speech by Dr. APJ Abdul Kalam at IIT Hyderabad.

I have three visions for India. In the history of 3000 years, people from all over the world have come and invaded us, captured our lands, conquered our minds. Starting from the Alexander, the Greeks, the Turks, the moguls, the Portuguese, the British, the French, the Dutch, all of them came and looted us, took over what was ours. Yet we have not done this to any other nation. We have not conquered anyone. We have not grabbed their Land, their culture, their history and tried to enforce our way of life on them. Why? Because, we respect the freedom of others.

That is why my first vision is that of freedom. I believe that India got its first vision of this in 1857, when we started the war of Independence. It is the freedom that we must protect and nurture and build on. If we are not free, no one will respect us.

India’s development is my Second Development. For 55 years we have been a developing nation. It is time we see ourselves as a developed nation. We are among the top 5 nations of the world in terms of GDP. We have a 10 percent growth rate in most areas. Our poverty levels are falling; our achievements are being globally recognized today. Yet we lack the self-confidence to see ourselves as a developed nation, self-reliant and self-assured. Isn’t this incorrect?

My third vision is India must stand up to the world. Because I believe that unless India stands up to the world, no one will respect us. Only strength respects strength. We must be strong not only as military power but also as an economic power. Both must go hand-in-hand. My good fortune was to have worked with three great minds.

Dr. Vikram Sarabhai of the Dept. of Space, Professor Satish Dhawan who succeeded him and Dr. Brahm Prakash, father of nuclear material. I was lucky to have worked with all three of them closely and consider this great opportunity of my life. I see four milestones in my career:

Twenty years I spent in ISRO. I was given the opportunity to be the project director for India’s first satellite launch vehicle, SLV3. The one that is launched Rohini. These years played a very important role in my life of science. After my ISRO years, I joined DRDO and got a chance to be the part of India’s guided missile program. It was my second bliss when Agni met its mission requirements in 1994.

The Atomic Energy Dept. and DRDO had a great partnership in the recent nuclear tests is the third bliss. The joy of participating with my team in these nuclear tests and showing the world that India can make it, that we are no longer a developing nation but one of them. It made me feel very proud as an Indian.
