Subject: Invitation Letter for Inaugural Function of TESLA – Reg.

Dear Sir,

We are pleased to inform you that department of EEE is planning to conduct "Inaugural Function of *TESLA* i.e., Student Association" of GVP College of Engineering for Women, Madhurawada, Visakhapatnam on 2nd September 2022. We celebrate this day by recollecting activities done by students till date and motivating them to do activities that benefit them for their growth. This association organizes co-curricular and extra-curricular activities for the benefit of the students to help them improve their skill set.

GVP College of Engineering for Women (Established in 2008) is a self-financed institution having well equipped laboratories, highly qualified faculty and good infrastructure. The college is recognized by AICTE and is affiliated to Jawaharlal Nehru Technological University Kakinada (JNTUK).

Aware of your experience in emerging trends in Research field, we feel it an honor to request you to deliver the Inaugural lecture

We request for your kind presence on the occasion of the Inauguration of the student association on 2nd September, 2022 at 10:00 am in GVP College of Engineering for Women, Visakhapatnam.

Thanking You.

Yours faithfully,

(PRINCIPAL)

TESLA INAUGURATION REPORT

Event: Inauguration of TESLA, 2022.

Date: 02-09-2022.

Guest: Dr. A. Hemachander.

Assistant professor

EEE Department

NIT Puducherry

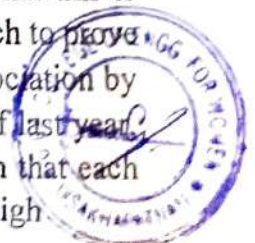

Puducherry

On the occasion on of Inauguration of TESLA, the Department of EEE atGVPCEW gathered together to initiate the start of a new academic year ahead, for the Student Association of the Department, TESLA on the dawn of Friday, 2nd of September 2022.

The Principal, Dr. Prof. Raj Kumar Goswami, Dr. R. V. S. Lakshmi Kumari, Head of the Department and the Guest started the event by lighting the Jyoti.

The session started with a Prayer Song by the Students. The principal shared his views about the Institution and told that it is a privilege to be part of TESLA, such organization that enables students to attain modesty development, for the institution's aim is to create oriented and technically skilled students, through Tesla students can gain knowledge, skills and experience in communication, problem solving, presentation, and learn the art of public speaking. So, he encouraged students to actively participate in all activities and develop your skills.

The Head of the Department also addressed the gathering and said that this is facilitating such a nice platform of TESLA, to the students of the branch to prove themselves and enrich their knowledge. She also encouraged the Association by saying that she is proud to be part of it and of all the achievements of last year, hoping students to enthusiastically participate in group activities such that each participant will enjoy the academic flavors of all programs and gain high

confidence levels. She wished the program to be a grand success and took the event forward after awarding badges to the new body of TESLA.

The New Tesla Secretary has said about the tesla activities that had carried through 2021-2022. She listed all the activities that had conducted through the academic year.

The New Tesla President gave a speech on her willingness to be a part of the Tesla Association. She expressed all her new ideas and activities that she wants to implement ahead.

The Chief Guest, Dr. A. Hemachander, shared his experience with the College and the Department. He also encouraged the students to take that path which will lead towards innovations which reward Sustainable Development and Forward marching of Technology, despite failures. He later proceeded to continue the event by giving a lecture on **Battery Management System**.

The session ended by winding up the Lecture and with a Vote of Thanks.

Battery Management Systems (BMS) are the key to the safe, reliable and efficient functioning of the lithium-ion batteries. There are four main kinds of batteries used in electric cars:

- lithium-ion,
- nickel-metal hydride,
- lead-acid, and
- Ultra capacitors

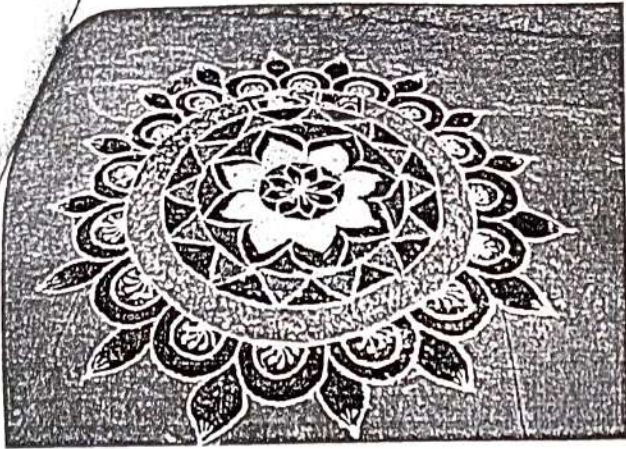

The oversight that a BMS provides usually includes:

- Monitoring the battery
- Providing battery protection
- Estimating the battery's operational state
- Continually optimizing battery performance
- Reporting operational status to external devices

These BMS can be fundamentally classified into – Centralized and Decentralized. Battery pack protection management has two key arenas: electrical protection, which implies not allowing the battery to be damaged via usage outside its SOA, and thermal protection, which involves passive and/or active temperature control to maintain or bring the pack into its SOA

BMS is extremely vital in ensuring the safety of battery pack. Decentralized BMS architecture is especially suited for these high voltage battery packs.

His Holiness Sri Sankara Vijayendra Saraswati Swamigal holy presence in College

Posted on 17th Feb 2023

His Holiness Sri Sankara Vijayendra Saraswati Swamigal of Kanchi Kavalakottipetham Kanchipuram blessed the Management, Staff and Students of the College by his Holy presence on 9/2/2023.

Hardware and Software Exhibition

Posted on 16th Jul 2022

A Hardware and Software exhibition was conducted in the college auditorium in part of the Republic Day Celebrations. More than 40 teams participated in the exhibition. The Chief Guest, Dean IQAC, GVP College of Engineering (A), visited the exhibits, congratulated and advised the students on the different aspects of the presentation. The Principal, Vice-Principals and HoDs thanked the students for their participation and congratulated all the participants for their wonderful exhibition.
