

Gayatri Vidya Parishad College of Engineering for Women (GVPCEW) intends to develop the potential in students in order to nurture their creative and analytical mindset on various engineering aspects. GVPCEW believes that the purpose of engineering education is to not only focus on pure studies but also provide opportunity to explore the capabilities and their areas of interest. At GVPCEW we also believe that soft skills are very important towards managing and leveraging the various opportunities and challenges of the society. The exponential growth in technologies in the recent past has led to the creation of a knowledge-based society where knowledge has become quite important aspect of success. Accordingly, development of soft skills is given due emphasis through interaction with eminent personalities. All avenues are also being explored towards making the students industry ready and the due emphasis is given to the placement of budding students. The role of parents cannot be underestimated in the holistic development of the child and therefore the institution believes in remaining in regular touch with parents as well. I would like to invite all those who wish to be part of this “Temple of Learning” to join “The Gayatri Vidya Parishad” family.

Prof (Dr.) RK Goswami
